COTON DE TULÉAR

"Home of the Rare Breed Coton de Tuléar" takes on a new significance as one of the private social clubs has declared its intention to deliver our breed to the AKC. Unfortunately, AKC acceptance means the AKC parent club loses nearly all control over the breed, as has happened with many other AKC breeds, leading to the deterioration of much of the gene pool in order to shape the appearance of the dogs for the show ring.

The American Coton Club (ACC) will remain a safe haven for the Coton de Tuléar and will never turn over the ACC breed registry to the AKC!
